

PhytoQuest Limited

NMR Services for Industry and Academia

^1H , ^{13}C , DEPT, 2D, quantitative analyses, structural elucidation

PhytoQuest Limited offers fast and high quality NMR analysis and interpretation using a Bruker Avance 500 MHz instrument

- 1D techniques such as ^1H proton and ^{13}C DEPT
- 2D correlation (COSY, HMQC, HMBC, NOESY) NMR
- Stereochemical configuration
- Molecular structure determination
- Impurity analysis and identification in samples
- Chemicals, solvents, pharmaceuticals, natural products
- Batch variation/Quality control
- Metabolomics
- Stability studies
- Data Interpreted
- ACD Prediction Software
- Reports and spectra provided in electronic format
- Reasonable rates
